
uploading avatar photos?

Posted by haika - 2009/03/01 14:27

Since I recognize the format of this forum as one used by a number of the other forums I belong to (grin), I went to upload my usual avatar photo. No go. Tricks we need to know to do this HERE, Jon?? The usual sequence of events isn't working.

Thanks Jon.....I think we are both puzzled about why this WORKS now (scratching head).

Hey Betty, I'm glad to see you on the forum! Hopefully it will facilitate many helpful discussions.

Obviously you got the avatar to work - cool! :cheer:

I'm not sure why it didn't work before though. :huh: The only thing that I can think of is that there is a 2 MB limit to avatar upload file size. Maybe the file you tried before was larger than that.
