## List of oldest ages determined for species

Posted by smejjati - 2014/10/23 11:31

---

Hey, so I have a list that shows the oldest ages reported for many species. I believe these ages were reported by CARE members and published. I think it came from the CARE website (it was here when I started the job back in 2008). But I can't seem to find it now. Anyone know where it is or where it came from? It is an old list and it must have been updated since. Thanks, sonya

Hi Sonya,

We have a slightly historic list of max ages that we've been updating with our own ages. If there are any newer max ages, we might not have them in this list. However, here is the link for the table.

<http://mtalab.adfg.alaska.gov/ADU/analysis.aspx#/maxage>

Kris also published this list in 2007

<http://mtalab.adfg.alaska.gov/ADU/Files/AFRB.08.1.012-021.pdf>

If anyone has updates for this table, or if there is a shared table that agencies could submit updates/ actively update, please let me know.
