

Structure Exchanges

CARE members participate in ageing structure exchanges for greater understanding of the ageing process and for alternate interpretations of growth patterns. Exchanges can be for training (a group that is beginning to age a new species can request structure exchanges from a group that has experience with that particular species) or for calibration of ages between two experienced ageing groups.

Refer to the CARE Charter for structure exchange protocols (PDF).

[Click here for a table of exchange results \(Excel\).](#) Updated June 2016.
